ELECTRONIC PIPETTES

The Picus Pipette family

REDUCE YOUR RSI RISK

Enjoy your work with the award winning Picus! Its highly sophisticated and completely ergonomic design will reduce your risk of repetitive strain injury (RSI). Fully electronic operation ensures the maximum accuracy and repeatability of your results.

- › Uniquely lightweight and streamlined design for effortless pipetting experience
- › Conveniently located soft-touch operating button and electronic tip ejection help minimize muscle strain
- › The comfortable design of the handle and finger hook enable Picus to rest lightly in your hand, with minimum effort
- › Electronic piston control and brake guarantee accurate and precise pipetting results, independent of the user

Contact our Liquid Handling Specialists
to find out more about the new Picus[®] 2

YES – WE DO TRADE INS

Now is the time to trade in your old pipettes for the most ergonomic electronic or mechanical pipettes available. Protect your hands from strain and improve your experiment reproducibility. All while receiving up to 40% OFF* with your trade-in.

*Up to 40% off RRP

MECHANICAL PIPETTES

The Tacta Pipette family

THE ULTIMATE IN ERGONOMICS

Tacta has been designed to feel great in your hands. Thanks to its ergonomic handle and finger hook, there is no need to grip the pipette tightly. Easy, safe and comfortable to use, Tacta meets the most demanding pipetting requirements, delivering consistently accurate results time after time.

- › Comfortable to hold due to the ergonomically designed handle
 - Weight only: 70-100g single-channel models
- › Low pipetting and tip ejection forces that reduce the risk of RSI and Work Related Upper Limb Disorder
- › The unique Sartorius Optilock system provides flexibility for volume adjustment and locking
- › Controlled and smooth tip ejection with the new Sartorius Optijet technology (levered tip ejection system)

MECHANICAL PIPETTES

The Mline Pipette family

WHERE PRECISION MEETS ACCURACY

Sartorius' mechanical pipette family - the Mline - offers excellent ergonomics, performance and safety in manual pipetting. It is particularly designed to maintain high accuracy and precision in repetitive and long-lasting pipetting. The Mline is an advanced and ergonomic choice for quality-conscious users who perform long and repetitive manual pipetting and is recommended by health and safety officers all over the world.

- ▶ Excellent ergonomics to protect from injuries with the exceptionally light pipetting and tip ejection forces
- ▶ High accuracy and precision, also in repetitive, long-lasting pipetting
- ▶ Minimised risk of contamination with Safe-Cone Filters and full autoclavability
- ▶ Increased safety with volume lock preventing accidental volume changes while pipetting

We Calibrate Pipettes!

ASK US FOR A COMPETITIVE QUOTE & RAPID TURNAROUND TIMES

Pipette Service & Calibration

Pathtech provides calibration, maintenance and repair services to extend the lifetime and ensure the continuous accuracy and precision of your pipettes via our Service Laboratories.

Why is Calibration and Maintenance Needed?

All pipette manufacturers recommend that regular maintenance and calibration is applied to maintain reliable pipetting results and to maximize the lifetime of the pipette. Pipette calibration is a fundamental part of Good Laboratory Practice (GLP) and quality systems and must be considered a vital part of any laboratory regime where precise volumes of fluid need transferring or diluting. Pipette performance is measured as accuracy and precision or how close the dispensed volumes are to the target and how close the results are to each other.

Our pipette service offerings give you choice.

Choose from Calibration Only or Calibration Plus Service based on your particular need.

Why choose us for your next service?

- › We service all major makes and models*
- › We only use quality and reputable products
- › Upfront costs, with no hidden extras.
- › Experienced Technicians.
- › Quick and efficient customer service with the use of our Asset Management Portal
- › Reward based customer loyalty
- › 10 years plus accredited laboratory

MAXI VOLUME LIQUID HANDLING

Midi Plus Pipette Controller

Midi Plus is a lightweight cordless pipetting controller, which allows aspiration from bottles and tubes without the arm and hand elevations required with serological or volumetric pipettes. It fits all commonly used glass or plastic pipettes but can also be used with Sartorius 5 ml and 10 ml disposable tips.

- Precise fingertip control of variable speed ranges

➤ Fits all commonly used 1 - 100 ml glass or plastic pipettes
- Hydrophobic autoclavable filter prevents from over aspiration

➤ Convenient fold-out bench stand supports the unit and pipette when not in use

 <div>SAVE \$240</div>	Midi Plus (inc. AC Adaptor)	Product Code	Original Price	SALE PRICE
	1 – 100ml	171-710931	\$579.00	\$339.00

The Prospenser and Prospenser Plus

The Prospenser and Prospenser Plus are high quality bottle-top dispensers with excellent chemical resistance. They are safe, convenient, and customizable, making them perfect for a wide range of dispensing needs.

- Extremely high chemical and thermal resistance due to ceramic piston, glass cylinder, and highly resistant fluoroplastic parts

➤ The incremental volume setup ensures accurate and repeatable results

➤ Fully autoclavable
- Wide range of adapters included to fit most common bottle sizes

The Prospenser Plus also includes 3 advanced features:

➤ Media Recirculation System, Smart 360° Rotating Dispensing Head and Universal Connector for drying tubes and filters.

MECHANICAL PIPETTES

The Proline Plus Pipette family

THE PREMIUM STUDENT PIPETTE

Proline Plus mechanical pipette family is designed to offer comfort and quality for your everyday manual pipetting. It combines durable construction with ease and lightness of use and is therefore a perfect choice for liquid-handling professionals and students alike. Proline Plus has low pipetting forces, a comfortable handle and a robust feel for heavier use.

- › The widest range of pipettes for various users and applications
- › Ergonomic design with light pipetting forces, comfortable handle and finger support for reduced risk of strain injuries
- › Minimised risk of contamination with Safe-Cone Filters and full autoclavability
- › Highly durable with strengthened structure also for heavier use

MECHANICAL PIPETTES

The Proline
Pipette family

IDEAL FOR TEACHING LABS

The fact that Proline, Sartorius' first mechanical pipette, is still in use in many laboratories by over 200,000 users, testifies to its timeless, practical design and reliability. Being the most affordable pipette in Sartorius' range of mechanical pipettes, it is ideal for universities and colleges, or any laboratory seeking a cost-efficient liquid handling tool.

- › Wide range of adjustable pipette volumes
- from 2.5ul to 5 ml

› Easy volume setting with click stop mechanism
- › Safe-Cone Filters available for models > 10ul

› Relatively lightweight, highly accurate and precise

Sartorius

Safetyspace® Filter Tips

Safetyspace® Filter Tips tips offer optimal protection for your work from cross contamination and enable you to use the full volume of the tip with any pipetting mode. In addition to protecting your samples, the filter protects your pipette.

Mind the Gap

The Safetyspace® gap is a unique product feature of Sartorius tips. It leaves extra room for the liquid, so it never touches the filter eliminating loss of sample, reducing risk of contamination and reduction in accuracy. Now you can use the entire volume range of your electronic pipette in any pipetting mode.

Aerosol Barrier Filter

Safetyspace® Filter tips are fitted with pure polyethylene filters that effectively capture solid and liquid aerosol particles. The filter is made without self-sealing additives to avoid any interference with your samples or results.

The Extra Space is Particularly Useful in the Following Applications:

- ▶ Pipetting foaming liquids such as buffers and proteins
- ▶ Pipetting solvents
- ▶ Multi dispensing and reverse pipetting

Sartorius Optifit Tips

STANDARD MULTIPURPOSE TIPS FOR VARIOUS APPLICATIONS

Sartorius Optifit tips are an excellent choice for various laboratories and pipetting tasks with their wide range of packaging and purity options. They ensure the performance of Sartorius pipettes and repeatability of your results like no other tip can.

Sartorius Optifit Tips are ideal for use with for Sartorius pipettes, enabling maximum accuracy and precision, as well as comfortable ergonomics. Sartorius pipettes feature a unique spring-loaded Optiload mechanism that makes it easy to attach tips while still ensuring a perfect seal. Non-filter Optifit Tips are available in various packaging types, purity certified and pre-sterilized.

High Quality Tips

Optifit tip manufacturing process has strict quality controls to ensure that each tip from each batch is uniform. They are made from medical grade polypropylene and thanks to the fully automated production process they ensure the purity level your experiments require.

Easy-to-Use Packaging

You have multiple convenient packaging options to choose from: ready-to-use single tray, two refill options or bulk tips. Tip racks and packaged are color-coded for easy matching with Sartorius pipettes.

Tip for Every Use

Our standard tip range is from 10 µl to 10 ml but you can also get specialty tips from us. When you are pipetting from hard to reach sample tubes or want to be extra gentle when pipetting your cells check our extended length or wide bore pipette tips.
